Jeju is proud of its unique cultural folk heritage as well as its geographical and historical relevance. Jeju itself is an extinct volcano with its peak jutting skyward at the center of the island and a side gentle hilltop that extends off the coast. Geographically unique anywhere in the world. There are beefous forests and mountains, fantastic rock formations and volcanic craters, caves and grasslands painting a natural beauty that is unique in this area.

There is a cave in the east and from the ceiling cold water pours down creating the waterfall.

- **Geumunoreum Tuff Cone**
  - A tuff cone rising out of the ocean were designated as UNESCO World Natural Heritage Sites for its unique geological features. It is a geological marvel with its volcanic origin, a distinct geological formation, and its unique cultural heritage.

- **Seongsan Ilchulbong Tuff Cone**
  - This site is designated as a UNESCO World Natural Heritage Site for its unique geological features. It is a volcanic cone rising out of the sea of Jeju Island, with its distinct geological formation and unique cultural heritage.

### Outdoor Activities

1. **Golf**
   - There are about 30 golf courses on the island. There is one right there at Jungmun Resort Complex (Jungmun Golf Club). Some of the Golf Courses near the convention center and Seogwipo City are below.

2. **Horse riding**
   - Jeju Island is an ideal place for raising horses. Throughout the year, there is little change in the temperature, and the island's lush green vegetation provides good conditions for grazing. On the mainland and freshwater plants can be grown even in winter. Throughout the island, you can easily find places that offer horse riding. With the help of a horse trainer, novices can take the beginner lesson of horse riding on a designated area.
